## NVL NUVOLA

**Starting At:** $1119

Nuvola is a group of sound-absorbing panels hung from the ceiling by steel cables. The panels can also be combined in different formats to create clouds of various shapes and sizes in order to make a room acoustically efficient with original and creative solutions. A shared hanging system means you can slide the elements perfectly, creating groupings that are easy to install. You can choose from a wide variety of configurations, from the simplest aligned elements to more complex, structured set-ups.
