71120 POLYURETHANE EDGE TOP

Starting At: $530

Falcon introduced the **urethane edge table top** line several years ago with our **71111** bullnose and **71333** no-drip edge. People have responded well to the urethane product because it is softer than a PVC edge and anti-microbial. The fact that we mold the edge directly to the table core makes it virtually impossible to remove. We are pleased to be expanding the urethane fused edge table line with the introduction of the **71120** edge. This edge is a **reverse knife profile** that is clean and creates a very sleek looking table. We think the table is perfect for contemporary dining applications where durability needs to dovetail into clean modern style.

Features:

- **Radius Corner:** Radius 1" Standard

Options:

Dimensions

- 1.25" x .375" molded urethane fused edge, reverse knife, with laminated surface several colors available, see finishes.
